15 Draw to Life

16 Nex Playground

17 Saio Floor Projections

— SECTION ONE

MAIN ARENA

14 experiences built for the gamers in you.

01

Segway Electric Kart

Drift-ready electric Segway karts paired with big-screen racing. Line up on the grid, floor the pedal, and race friends on real wheels indoors.

02

KatVR

Omnidirectional treadmill VR

Strap into an omnidirectional treadmill and physically walk, run and turn inside virtual worlds. Full-motion VR that turns every step you take into a step in the game.

03

Storm Master X2

Tank shooting

Pilot a remote-controlled battle tank across the arena floor and knock down targets with soft-dart fire. Drift, aim, shoot — last tank standing wins.

O 4

K1 Robot

Voice-controlled robot

Command a humanoid robot with your voice — tell it to walk, kick and score. Go head-to-head in robot football matches

05

Nintendo Arena

Big-screen Nintendo Switch stations ringing the live circuit. Grab a Joy-Con and jump into party favourites with friends and family.

06

Retro Games Arcade Machine

Over 25,000 games

Twin-seat arcade cabinets loaded with over 25,000 classic and modern titles — from retro shooters to fighting games. Pull up a chair, grab the joystick, and battle head-to-head.

07

Omniball

Hurl real balls at a giant interactive wall and watch targets shatter on impact. Play games like Candy Crush, Tic Tac Toe, Destroy Tetris and boss battles — full-body, high-energy fun.

08

Mario Kart Live Circuit

Drive a real kart around a real neon-lit track — through the screen. Cameras on each kart blend the physical circuit with in-game items, boosts and rivals.

09

Simulator

A pro racing rig with force-feedback wheel, pedals and a race seat in front of a giant screen. Take an F1 car around real circuits and chase the lap record.

10

Dartsee

Interactive darting

A smart, camera-tracked dartboard that scores every throw automatically. Play classic 501, cricket, or party modes with friends — no chalk, no math, just darts.

11

VR Cricket

Bat in a virtual stadium with a real bat in your hands. Face bowlers of every pace inside the net cage — every shot tracked, scored and replayed.

12

LaserDance

Duck, twist and dance your way through a web of laser beams against the clock. Every touched beam costs you points — flexibility and nerve win the leaderboard.

13

MR Station

Mixed reality gaming experiences
blending VR and Reality perfectly —
Spatial Ops, Laser Maze & more

14

VR Edutainment

Explore the universe, encounter prehistoric dinosaurs, and unleash your creativity through immersive 3D Cubism experiences. Learn, discover, and have fun—all in Virtual Reality.

— SECTION TWO

Kids Zone

Five experiences built for the youngest players — creative, safe and hands-on.

13

AR Gardening

A magical augmented-reality sand table where beaches, ponds and gardens come alive. Scoop, plant and catch projected fish with your bare hands.

14

Ballpit Whack 'Em Mole

Dive into the ballpit and bop the light-up moles as they pop. Fast hands score big — a giggly, high-speed classic reinvented for little players.

15

Draw to Life

Colour a fish on paper and watch it swim into a giant projected ocean seconds later. A magical creative corner where every child's drawing becomes a living character.

16

Motion Sensor Games

No controllers, no headsets — your body is the game. Swipe, punch and jump in front of a giant screen that tracks every move in real time.

17

Saio Floor Projections

Games beamed straight onto the floor that respond to every step, stomp and jump. Hopscotch, football and puzzle modes that get kids moving together.
